

## Industrial Strength Odor Eliminator

SRC is a highly concentrated liquid formula for immediate contact elimination of odor from waste and/or wastewater. SRC contains 3 deodorizing components to quickly eliminate odors and prevent them from returning. Spray directly to the surface of the waste material for long lasting odor control.

## Compost Treatment & Odor Control

SRC is a concentrated compost treatment and odor controller used to accelerate decomposition rates and provides effective odor elimination from within. Injected into

the compost material as it is processed or topically applied to control odor flare-ups. Treated compost can be processed faster and results in higher fertilizer values and a more mature end product
